Professional Experience

Squared | New York, NY

Mar 2023 - Present

Full-Stack Web Developer | Next.js, TypeScript, Express, PostgreSQL, Shadcn, HTML, TailwindCSS

- Architected core features for a task management tool, raising workflow efficiency by **40%** and user retention by **25%**.
- Led integration services with GitHub, Slack, and Figma data, boosting user engagement and real-time insights by **30%**.
- Proactively mentoring **10+ junior engineers** to enhance their coding skills and understanding of software development best practices resulting in a **20% increase** in code quality and efficiency within the team.
- Refactored a **100,000+** line codebase from JavaScript to TypeScript by incorporating design patterns and optimizing algorithms, leading to a **30% improvement** in overall system performance and a **25% reduction** in page load times

NodesOfCode | New York, NY

Jun 2021 - Feb 2023

Full-Stack Web Developer | Next.js, TypeScript, Express, Node.js, MongoDB, HTML, CSS

- Spearheaded scalable web development at a software agency, delivering **10+ client solutions** enhancing efficiency.
- Served as Sprint Lead, streamlining Agile processes to boost productivity and **deliver 5 projects ahead of schedule**.
- Translated UI/UX designs into pixel-perfect pages using Next.js and styled-components, **increasing user engagement by 25%** and driving asset management, fundraising, and education, contributing to retention growth.
- Resolved **100+** critical bugs using Jest and Cypress testing frameworks which **decreased bug reports by 20%**.

Stony Brook WiCS — (Women in Computer Science) | Stony Brook, NY

Sep 2017 - May 2020

Full-Stack Web Developer Tutor

- Directed after-school Zoom sessions with a cohort of **15+ students**, focusing on enhancing their proficiency in data structures & algorithms, and system design resulting in a **10% improvement** in their overall success rates.
- Meticulously debugged students' assignments written in React, Node, and Express, which collectively spanned **over 50,000** lines of code, and delivered constructive feedback to enhance their problem-solving abilities.
- Trained students on building large and scalable RESTful APIs using the MVC design pattern, while also teaching them how to effectively utilize modern databases like MongoDB for streamlined data management and flexibility.

Project-Based Experience

NexaCoin | Next.js, TypeScript, Redux.js, HTML, Tailwind CSS | [Github](https://github.com)

Nov 2020 - May 2021

An innovative cryptocurrency platform for real-time analytics and streamlined portfolio management

- Engineered highly responsive UI components with Next.js and Tailwind CSS, advancing timelines and engagement.
- Integrated real-time cryptocurrency data from the Coingecko API, boosting UX and **doubling session durations**.
- Orchestrated centralized state management with Redux, ensuring seamless data flow across **100+ components**.
- Streamlined site performance with advanced caching strategies, achieving a **25ms reduction** in page load times.

Market++ | React, NodeJS, Express, MongoDB, HTML, CSS | [Github](https://github.com)

May 2020 - Dec 2020

A full-stack MERN web application that aggregates marketplaces into one easy-to-use platform

- Built modular, reusable components with React and Material UI, improving maintainability and user interaction.
- Designed a secure Auth-based authentication using JSON Web Token, increasing data safety by **50%**.
- Implemented a RESTful API using the MVC design pattern, capable of scaling up to **10,000** users per month.
- Retrieved hundreds of article data from eBay and Etsy APIs, enabling diverse product exploration within the web app
- Analyzed GraphQL requests from Facebook to reverse-engineer third-party APIs elevating data-driven functionalities.

Education

Stony Brook University

Stony Brook, NY

Bachelor of Science in Computer Science

Jan 2021

- Coursework: Object-Oriented Programming, Data Structures, Analysis of Algorithms, Object-Oriented Design, System Fundamentals, Web Development, Scripting Languages, Principle of Database Systems, Software Engineering

Skills

Languages: TypeScript, JavaScript ES6, HTML, CSS, SCSS/SASS, Python, Java, Perl, C, C++, Bash, SQL

Frameworks/Databases: Next.js, React.js, Express, Tailwind CSS, Bootstrap, Redux, MongoDB, NoSQL, PostgreSQL

Technologies/Others: Node.js, Socket.IO, Axios, AJAX, REST APIs, jQuery, GraphQL, UI/UX, Figma, CMS/CRM,

Wordpress, SEO Optimization, Prisma, Git, AWS, Vercel, Docker, Linux/Unix, Mocha, Chai, Jest, Agile, CI/CD, TDD, SDLC
